

■ DESKO SP 500 - Tablet Kiosk

Passport & ID Reading, Verification and Signature Capture

Verify passports and IDs, display transaction details and signature capture functions in a secure, ergonomic and highly efficient kiosk system. The integration of these functions make the DESKO SP 500 - Tablet Kiosk the solution for every verified transaction. Ideal for applications in banking, government, travel and general POS; wherever security can not be compromised by efficiency. The all-in-one ergonomic design presents transaction details for signature collection and stream lines the verification of ID documents and cards.

Your Advantages

- 10.4" LCD screen - largest screen for terminal and signature capture on the market
- Signature PAD technology for legally - binding signature capture
- Passport and ID reader/ verifier, magnetic stripe, bar code and chip card reader in one device
- Display transaction detail electronically - process handling without cross-media conversion
- Stream lined - fraud protection
- Optional ICAO RF-ID "e-Passport" module

■ DESKO SP 500 - Tablet Kiosk

System Features

The DESKO SP 500 - Tablet Kiosk is a combined solution of OCR, magnetic stripe, chip card and bar code reader as well as full page digitizer/ signature PAD technology. This combination allows a verified transaction process and legally binding signature capture in an efficient and secure way. Signature capturing technology and the ability to display a contract or form to the client for signing helps to avoid cross-media conversions.

Integrated Features

- Full page digitizer/ signature PAD with electromagnetic, pressure-sensitive pen; ensures legally binding signatures
- 10.4" screen (largest display for verified transaction purposes on the market)
- Bi-directional OCR swipe reader for all ICAO conforming travel documents, ID cards, passports, visas as well as TAT, ATB1 + ATB2 tickets.
- Bi-directional magstripe swipe reader for all magnetic based cards and documents, ATB1/2 tickets, credit and debit cards as well as any type of customer/ service card.
- Integrated chip card terminal can handle synchronous as well as asynchronous cards according to the ISO 7816 standard.
- 12V power supply

Optional Features

- RFID e-Passport reading

Interface & Communication

Host:

- Communication via USB and VGA with any PC or tablet PC system

Peripheral:

- Four USB client ports
- Additional 2D bar code gun or any kind of USB device can be attached
